

All Peoples Health plan members are eligible for an annual comprehensive wellness assessment. And members are eligible to earn a \$50 reward through Peoples Health Rewards when they complete the assessment.

The assessment is a no-cost benefit for members, who pay no copay or coinsurance for it. It's a chance for them to meet one-on-one with a provider, who will collect important information about the member's health status.

Members can have the assessment in a way that's most convenient to them. For instance, they may be able to receive it at a Peoples Health Service Center, in their home through an in-person visit or via telehealth.

The assessment helps members understand their medications and the long-term health conditions they have, learn about preventive steps to take, and set personal health goals.

Members can learn more or request an appointment at peopleshealth.com/cwa.
